

Jing Yang

Arlington, VA 22203

(385) 207-6475 , usview@outlook.com , <http://linkedin.com/in/yangview>

EDUCATION

Master of Computer Science University of Utah

Salt Lake City, UT, 2015

Courses : Advanced Algorithm, Artificial Intelligence, Data Mining, Machine Learning, Natural Language Processing, Biomedical Information Retrieval, Big Data Computer System, Scientific Visualization, Math of Computer Graphics, Advanced Scientific Computing, Parallel Programming Many-Cores

Bachelor of Information and Computing Science Beijing Jiaotong University

Beijing, China, 2003

COMPUTER SKILLS

Deep Learning, Tensorflow, PyTorch, AWS, Sagemaker, OpenAI, LLM, Big Data, Hadoop Spark, Scala, MPI, Scientific Visualization, Natural Language Processing, GPU Programming, Machine Learning, Algorithm, GIT, SQL, RESTful Web services, spaCy, NLTK, Stanford CoreNLP, SAS, R, NumPy, Pandas, Keras, Rasa. AWS Certified Machine Learning Engineer, Hugging Face, LangChain, LangGraph, AI agents, RAG, Claude, Computer vision, Databricks, Snowflake, Azure, Kubernetes, ONNX

Languages : Java, Python, C++, C, JavaScript, Scala.

Operating Systems: Windows, Unix, Mac OS.

EXPERIENCE

Senior Machine Learning Engineer Capital One, McLean, Virginia

2024 Sep- 2025 Nov

- LangChain and LangGraph agent, Chatbot, RAG applications. Computer vision application.
- Model training with Weights & Biases (W&B) on the Capital One Enterprise Model Platform (EMP).
- GenAI applications with Weights & Biases (W&B) and Weave on the Capital One Enterprise Model Platform (EMP).
- AWS Certified Machine Learning Engineer.
- Designed a scalable solution to upload and download 500+ GB files using AWS Lambda.

Senior NLP Engineer Presto, San Carlos, California

2022 Oct- 2023 Nov

- A leading conversational AI. OpenAI dialogue model training for chatbot.
- AI agents. Voice AI agents. RAG.
- Automatic speech recognition (ASR) accuracy improvement.
- Real-time chatbot supervision. The AI to supervise ChatGPT bot.
- Real-time log infrastructure for dialogue model training and LLM model fine-tuning.

Machine Learning Scientist Wisely Inc (OLO), Washington D.C. Metro Area

2021 March- 2022 Jan

- A leading customer intelligence platform for restaurant brands. Wisely was acquired by OLO.com.
- AI model for sentiment analysis of restaurant reviews. A top feature in the acquisition; best performance in the industry.
- Model deployment on AWS SageMaker.
- Model to estimate accurate wait times.

- Senior Software Engineer* 2019 Dec-2020 April
Pantheon, Washington D.C. Metro Area
- The Agency for Healthcare Research and Quality (AHRQ), website development and deployment on AWS.
 - SAS application deployment. Automated browser testing and monitoring with Ghost Inspector and Selenium. Languages: Java, JavaScript, SAS.
- Senior Data Science Engineer* 2017 May-2018 August
Oracle North America, Washington D.C. Metro Area
- CTO award winner on NLP and deep learning project in a 1,700-person org.
 - First TensorFlow model release and deployment in cloud.
 - Deep learning, machine learning and NLP in Machine Learning team.
 - Entity recognition and topic classification with TensorFlow and GPU.
- Consultant* 2016 November-2017 March
Blueprint Consulting Services (Client: Microsoft Supply Chain) Bellevue, WA
- Complex event processing; event-driven architecture for supply chain.
 - Cloud-based solutions; RESTful web services.
 - Near real-time in-memory service health management platform.
 - Scala, Apache Spark, Hadoop, HDInsight, Metrics, PaaS.
 - Microsoft Azure; Microsoft Application Insights. Languages: Java, Python.
- Software Development Intern* CLOUDPARTICLE, 2016 March- 2016 November
- Provide RESTful Web services for Information Retrieval, Search.
 - RESTful services with Node.js. Languages: Java, JavaScript.
 - Smart device application prototype.
 - Implement NLP tools for search intention, parsing, named-entity recognition.
 - Machine learning, syntactic and semantic analysis.
- Senior Software Engineer* 2015 August -2016 February
Avalara, Inc. Seattle, WA (A leading cloud-based software platform)
- Product search engine to understand unstructured data.
 - RESTful services with Node.js. Website development and deployment on AWS.
 - Implement NLP tools for search intention, parsing, named-entity recognition.
 - Provide RESTful web services for product search, classification and taxonomy.
 - Search intent understanding and search infrastructure.
 - Sole owner for core components of search, match and ranking.
 - Applied machine learning and NLP in production.
 - Scrum methodology; daily stand-up meetings.
 - Tools: NLTK, Stanford CoreNLP, Java, Node.js.
- Research Assistant* 2014 April -2015 May
University of Utah
- NLP and machine learning tools which process pattern training and annotation.
 - Worked with the professor and research scientist from the US Department of Veterans Affairs. Publication in a top conference.
 - RESTful web services development and deployment on AWS.
- Senior Analyst & Engineering Team Leader* 2012 -2013 August
JD.com (A leading e-commerce company. NASDAQ: JD), Beijing, China
- Applied machine learning and NLP in an e-commerce internet company.
 - Discovered the hidden interests of users.
 - Led an R&D team on search and recommendation in Beijing.

- Designed and implemented algorithms in online recommendation and search systems.
- Designed and implemented algorithms in clustering and collaborative filtering on big data.
- Designed and implemented online purchasing capability for China.
- Built services to support user profiles.
- B2C web environment.
- Tools: Big data, Java, Hadoop, Mahout, MongoDB, Hive, NLTK.

AWARDS LIST

Mathematical Contests in Modeling , Honorable Mention Consortium for Mathematics and Its Applications,USA	2003
Mathematical Contests in Modeling ,First Class,Beijing Society for Industrial and Applied Mathematics,China	2002
Mathematical Contests in Modeling , Successful Participant Consortium for Mathematics and Its Applications,USA	2002
