

Chase Ashby

7+ Years Experience | Full-Stack Engineer | .NET Specialist

Chaseashby199@gmail.com | 501-410-5154 | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

Professional Summary

Experienced Full Stack Software Engineer with 7+ years of building scalable .NET and React applications backed by PostgreSQL. Strong background in designing REST APIs, modernizing legacy systems, and optimizing backend performance in cloud-based environments. Skilled in Git for version control and collaboration, with a proven ability to deliver secure, maintainable solutions using Azure, Docker, and CI/CD best practices.

Skills

Backend: .NET 6/8/10 Core, Rest APIs, Minimal APIs, Microservices, Dapper, Entity Framework Core, MediatR, Fluent Validation, SignalR, MassTransit, Polly, Swagger

Frontend: React, React Query, Tailwind CSS, Axios, RxJS, Webpack, Vite, Angular, [Node.js](#)

Programming Languages: C#, TypeScript/JavaScript, Java, Python, SQL, T-SQL, pgSQL

Tools & Database: Postgres, Git, Docker, Git Actions, Azure, Azure insights, Redis, Postman, Jira, Azure Devops

Core Competencies: Problem solving, Backend Optimization, API Design, Performance Tuning, UI/UX design, Communication, Scrum & Agile Methodologies, PLM, CI/CD, Object-Oriented Design, Developer Tools

Experience

Software Engineer III

American Eagle Outfitters

Sep 2025 - Feb 2026

- Completed the migration and optimization of legacy postgres stored procedures to modern .NET8/10 programs running on a schedule, reducing query execution times by 43% on average.
- Implemented RBAC and JWT auth on a modernized .NET 10 enterprise product, increasing security and regulation across the platform.
- Designed and implemented an organization level database schema and REST API using postgres and .NET 8.
- Created worker services for gathering data from 3rd party partners and storing them in a postgres database, these workers were deployed in Azure App Services via a docker image and CI/CD pipeline using GitActions.

Senior Software Engineer

Eastern Bank

Apr 2025 - Sep 2025

- Designed and developed secure, scalable backend services using .NET 6/8 and C# to support digital banking platforms and internal financial systems.
- Architected and implemented REST and Minimal APIs for high-volume transactions.
- Led a modernization effort migrating a legacy .NET Framework application to a microservices based architecture.
- Built responsive frontend in React and Typescript, improving customer onboarding flow.
- Optimized database performance in PostgreSQL and SQL server through indexing, query tuning, and execution plan analysis.

Software Engineer III

Dynamic Software Solutions

July 2024 - Mar 2025

- Collaborated with product managers, UX designers, and cross-functional stakeholders to translate wireframes and business requirements into scalable, secure .NET, React, and Postgres applications.
- Designed and developed REST APIs and backend services supporting high-availability government systems, ensuring clean architecture and maintainable code.
- Built responsive React front-end components integrated with .NET APIs delivering accessible, userfriendly web applications aligned with the public sector performance requirements.
- Conducted peer code reviews, enforced Git-Based version control best practices and mentored a junior developer on maintaining code quality and consistency.

Chase Ashby

Software Engineer II

Kratos Defense and Security Solutions

Feb 2023 - July 2024

- Led the modernization of legacy telemetry collection software from a WPF application to a modern .NET 8/React/Postgres web platform, improving maintainability and long-term extensibility.
- Architected and implemented REST and minimal APIs in .NET 8 to support real time telemetry ingestion, validation, and processing.
- Designed a responsive React front-end with TypeScript to replace the legacy desktop UI, enabling cross-platform access and improving user experience for internal stakeholders.
- Re-architected the data layer using PostgreSQL with optimized indexing and query tuning, significantly improving telemetry processing performance.

Software Engineer I

Siemens Digital Industries

Jan 2019 - Dec 2022

- Developed and maintained full-stack features using .NET Core for backend APIs and React (TypeScript/JavaScript) for responsive front-end components.
- Designed and integrated REST APIs with a PostgreSQL database, implementing CRUD operations, data validation, and optimized SQL queries.
- Wrote clean, maintainable code adhering to OOP and team coding standards, contributing to scalable and testable application architecture.
- Troubleshoot and resolves bugs across the full-stack, improving application performance, reliability, and user experience.
-

Education / Certifications

BS, Computer Science, Mathematics Minor
University of Cincinnati, Cincinnati

2017-2022

Microsoft Certified: Azure DevOps Engineer Expert (AZ-400)

2024
