EDUCATION

Masters

Master of Computer Applications

SKILLS

JAVA/J2EE
Spring Boot
Microservices
Spring
Spring AI
Generative AI
Spring LLM
Amazon EC2
Azure
Dockers
Kubernetes
Aks Script
CI/CD Pipeline
Shell Script
Control M
Sonarqube
React JS
Apache Kafka
AWS Lambda
Amazon S3
Amazon RDS
Amazon SQS
Google Cloud Platform
Jenkins
EJB 2.0
JMS
JQUERY
Git/SVN/CVS
Oracle, DB2, MS SQL,
PL/SQL and MySQL
PostgreSQL/Cassandra
Apache Tomcat Maven / Gradle

CAREER OBJECTIVE

Senior Liferay DXP / Java Architect with extensive experience in Java Spring Boot and cloud services, known for delivering scalable microservices and improving application security. Skilled in collaborating with cross-functional teams to drive project success using agile methodologies and effective communication. Dedicated to upholding high software quality standards.

WORK EXPERIENCE

Individual Contributor (Contractor)

LTM (Client: Prudential)

📅 July 2021 - April 2026

- Served as an individual contributor responsible for diagnosing and resolving production support issues, as well as delivering system enhancements and performance improvements.
- Worked on payment Gateways and Azure APIM to trigger 3rd party services.
- Worked on MuleSoft few features.
- Designed and developed RESTful Microservices using Java 17/21, Spring Boot, MSSQL, and Maven. Containerized and deployed applications on Microsoft Azure using CI/CD Pipelines.
- Integrated Apache Kafka for event-driven architecture by consuming and producing streaming messages between services; implemented secure inter-service communication using OAuth2 with Spring Security.
- Monitored performance of 10+ cloud services with Grafana, optimizing configurations in YAML, resulting in a improvement in service uptime.
- Developed and executed JUnit test cases, resolved application vulnerabilities (Veracode), and actively collaborated on requirements and debugging in a fast-paced Agile team.
- Integrated with third-party platforms by publishing and consuming SOAP web services.
- Implemented LDAP authentication to centralize user access management and strengthen application security.
- Built and maintained enterprise applications using Spring Boot and Spring Batch, ensuring scalability and reliability.
- Designed and implemented kafka publisher and subscriber services for processing email, sms and notification delivery.
- Developed the admin module using ReactJS and integrated it with backend microservices.
- Built responsive admin interfaces in ReactJS and consumed internal microservices APIs.
- Designed and implemented the ReactJS admin portal with seamless communication to internal microservices.
- Developed a ReactJS admin dashboard that interacts with internal microservices for data processing and management.
- Implemented frontend functionality in ReactJS for the admin module and connected it with microservices architecture.
- Implemented end-to-end CI/CD automation using GitHub Actions for deploying microservices and applications to cloud infrastructure.
- Automated build, test, and deployment pipelines using GitHub Actions, improving deployment efficiency and release reliability in cloud

Splunk

Svn
Cvs

environments.

- Implemented centralized logging and monitoring solutions using Grafana, Prometheus, Kibana, Elasticsearch, Elastic Stack (ELK Stack), Grafana Loki, and Splunk to improve system observability and incident resolution.
- Developed unit and integration test cases using JUnit 5, Mockito, and Spring Boot Test to ensure application quality, code reliability, and test coverage.
- Proficient in developing automation scripts using Unix shell scripting and Python to streamline operational and deployment processes.
- Strong knowledge and hands-on experience with NoSQL databases including MongoDB and Amazon DynamoDB for designing scalable and high-performance data solutions.
- Implemented authentication and authorization solutions using OAuth 2.0, SAML, LDAP, SSO, and API Gateway technologies to secure enterprise applications and microservices.

Team Lead

Wipro Ltd (Client: Health Plan Services)

 July 2017- July 2021

- Designed and led to the deployment of RESTful microservices using Java 8 and Spring Boot.
- Engineered real-time, event-driven systems by producing and consuming messages via Apache Kafka. Built resilient backend APIs integrated with AWS Lambda, and managed file storage and retrieval using Amazon S3 and Sterling Integrator.
- Liferay DXP migration of portlets from 6.2 version to 7.2 Version.
- Migrated the spring mvc portlets to a new Digital experience platform.
- Production support activity after going live.

Team Lead

Wipro Ltd (Client: UBS)

 Jan 2015 - June 2017

- Developed a web-based enterprise application using Struts Framework with MVC architecture, enhancing maintainability and resulting in a 30% reduction in bug reports.
- Developed and maintained robust features using Java, ReactJS, JSP, Servlets, and Enterprise Java Beans (EJBs) for seamless front-to-backend integration.
- Developed XML-based object-relational mapping for Java, enhancing data persistence workflows with Sybase and reducing processing time by 30%.De
- Designed and validated rich front-end components using JavaScript, AJAX, and jQuery, delivering dynamic and interactive user experiences.
- Developed 50+ comprehensive unit tests and conducted integration testing using JUnit to ensure application reliability in multi-tier environments.

Technical Lead

Infosys Ltd (Client: P&G)

 Dec 2012- Dec 2014

- Liferay 6.2 Implementation with Spring portlets
- WebServices(SOAP) Implementation (Publishing and Consuming the Services using CFX tool)
- Gathering the requirements and preparing the HLD's
- Maintaining the team and execution of the project.
- Developed 50+ comprehensive unit tests and conducted integration testing using JUnit to ensure application reliability in multi-tier environments.

Module Lead

Ebix Software India Pvt Ltd, (Client: MassMutual)

 Nov 2008 - Dec 2012

- Webservices (SOAP) Implementation (Publishing and Consuming the Services using RAD tool)
- Developed modular EJB components for business logic and validation, improving application scalability and reducing code redundancy by 30%.
- Worked closely with a team of 5 business analysts to gather requirements and designed 10+ JSPs for Data Entry, Back-End, and Service Delivery modules, enhancing user navigation time by 15%.
- Managed build releases and resolved production blockers during deployments, ensuring timely software delivery for critical applications.
- Tracked and resolved production issues by analyzing root causes and implementing fixes, ensuring timely releases and product stability.

Module Lead

Ebix Software India Pvt Ltd, (Client: Sunlife)

 July 2007 - Dec 2008  Hyderabad, Telangana

- Developed and maintained front-end and business layers for 5+ applications using Struts and Hibernate ORM, improving integration and performance across all tiers.
- Led Agile software development lifecycle, utilizing paired programming and TDD to enhance code quality and streamline testing phases.
- Created 10+ UML diagrams, including use case and class diagrams, and enhanced data access by implementing Hibernate for Java object-relational mapping.
- Developed web-tier components using the MVC design pattern with Struts, enhancing application performance and user experience for 100,000+ users.
- Developed SOA-based web services with SOAP and Apache Axis.
